Constitutional Ambiguities: 0 remaining **Constitutional Contradictions:** 0 **DEFERRED Domains:** 1 (SDM-14 Research Intake — correctly preserved as DEFERRED)
VALIDATION_REQUIRED Items: 17 (correctly preserved — mathematical items, not constitutional gaps)

CHECK_04 ANNOTATION

SDM-CONST-15 Activation Mode 1 contains the phrase "autonomously execute research,

analysis, monitoring, and report generation." This is constitutionally consistent with SDM-CONST-06 (Human Approval Is Mandatory). SDM-CONST-06 governs trade actions. SDM-CONST-15 governs research, analysis, monitoring, attribution, reporting, and governance functions exclusively. SDM-CONST-15 contains three explicit prohibitions confirming that no trade execution authority is granted:

- 1. "This authority does not grant trade execution, order placement, order modification, or any autonomous market action."
- 2. "No activation mode grants trade execution authority."
- 3. "Human approval remains mandatory before any trade action regardless of which activation mode produced the underlying recommendation."

No contradiction exists. CHECK_04 PASS confirmed.
